Subject: Re: Flight/travel OK?

Yes. But I have been dealing with the St. John pesticide poisoning case for most of the day I just met with Geoff garrison. He is doing a great job. Then I briefed Jose and called and spoke to Eric. It is a very serious situation with 4 people in the hospital. I will call you in the morning on what to report out on for the 1pm call. I have informed numerous people at hq. I swam for ten minutes. Tried to read but it rained pretty hard. Any attempt to have a free afternoon never seems to work. Oh well.
